WORK EXPERIENCE

Software Engineer inFeedo

06/2022 - 9/2023

Delhi

InFeedo is a software company whose main product is Amber, a AI integrated Employee Experience platform which collects employee sentiment at scale.

Achievements/Tasks

- Contributed to the architecture and development of "Chat-Engine" which is the most critical microservice of Amber application and is responsible for driving the chat functionality and analytics. This microservice can handle thousands of sessions concurrently.
- Implemented AI chat summary and sentiment acknowledgement, this feature can condense the user's chat with Amber into a small paragraph highlighting main pain-points, used **GPT-3** to develop this feature.
- Main tech stack used: **React, Javascript, Node.js, MySQL, AWS**

Software Engineer Keka HR Technologies

10/2020 - 9/2023

Achievements/Tasks

- Implemented features for Payroll module, Core HR module and Performance module.
- Contributed to migration of existing mobile app to a new Clean Architecture-based solution which uses **Bloc** for state management. 📄
- Contributed to migration of codebase to **Null-Safety** and overall Keka theme revamp.
- Created custom plugin to capture offline attendance based on GPS for **Android** via **Method Channels**. Managed to improve Play Store ratings from 3.5 to around 4 and now has over 100K+ downloads.
- Main tech stack used : **ASP.NET Core, Azure DevOps, Flutter, Angular, SQL Server**

PROJECTS

Team based task management application (09/2023 - 09/2023) 📄

- Developed a task management application based on Kanban board to mimic the functionality of Trello
- Used **Node.js, React, MySQL** stack.
- Dockerized the application and deployed on Render

CRWN Clothing Store (04/2022 - 04/2022) 📄

- Developed a clothing store application using **React 18**
- Implemented state management using **React-Redux** and implemented authentication using **Firebase**
- Integrated **Stripe** for payment processing

EDUCATION

Bachelors
